## Taj Mahal

Inspired by the serene majesty of the legendary Indian mausoleum, the Taj Mahal collection recreates the perfect balance between understated luxury and tranquil beauty in large-format porcelain. Its soft, undulating waters, in a palette of warm beiges with subtle pearlescent reflections, evoke the light that caresses the stone under the Agra sun. Taj Mahal blends seamlessly into projects that value essential elegance and interior design proposals that seek a neutral, warm and striking backdrop. Its design is part of the Roca Tiles colour ecosystem, in harmony with other collections that opt for a sophisticated, organic and timeless palette.
