Slip resistance (CTE ENV 12633 - Pendulum)

Slip resistance (CTE ENV 12633 - Pendulum): Clase 2

Campora

Its name evokes an open landscape, where stone rests, is exposed and matures in the open air. As in nature, each piece takes shape in its own way, with veins, fossil details and subtle tonal variations, creating unique surfaces that range from warm whites to mineral greys. Roca translates this interpretation into porcelain stoneware with an aged, almost hammered finish, combining visual relief with the sensation of time-worn material. Natural, compact and highly versatile, it is designed to work effortlessly across different spaces and compositions. Each design functions as a different fragment of the same landscape. There is no obvious repetition, but rather a succession of subtle variations that allows the overall composition to breathe with authenticity. Campora dresses spaces with a sense of calm, but never neutrality. It is a luminous, understated stone with character, capable of leaving a lasting impression.
