Costa

Limestone texture. The Atlantic Ocean and its lighthouses, its wooden houses, its resistant walls eroded by the sea... Costa is a white body wall tile that finds its inspiration in limestone and the coastal landscape. Designed as a charismatic range for kitchens or bathrooms in Blanco, Arena, Gris and Visión. As a tribute to natural wear due to the erosion of the sea, Costa presents two decorative elements: Suite Costa, in which small worn stones provide relief to the ensemble and Costa Deko, which replicates a hand painted décor on stone. Range available in 21.4x61 cm.
