Marble Calacata Gold

The series is inspired by the classic Calacata Gold Marble, extracted from a deposit at Monte Altissimo in the Italian Alps. The wide variation in surface designs combines veins with shades of gray and gold. The result is achieved with high technology and HD printing. The rectified part must be applied with a minimum joint of 1mm to obtain a light look and enhance the marble effect. High durability, greater stain resistance and easy cleaning of porcelain tiles make the Calacata Gold Series an excellent option for environments where a classic atmosphere is desired or for contemporary environments where marble has a prominent role.
