## Biosafe Tile

El innovador acabado Biosafe Tile tiene propiedades altamente antibacterianas gracias al complejo proceso de investigación y desarrollo tecnológico aplicado en la producción de nuestro porcelánico coloreado en masa.

El centro tecnológico AINIA, con 2.800 m<sup>2</sup> de infraestructuras analíticas que dan respuesta a las diversas necesidades del sector alimentario y afines, ha verificado las propiedades antimicrobianas del nuevo porcelánico mediante una prueba de ensayo basada en la norma ISO 22196, que determina la capacidad antibacteriana de superficies no porosas.

Las sustancias activas incorporadas al esmalte de las piezas son capaces de inhibir el crecimiento de bacterias. Este nuevo desarrollo incrementa el grado de seguridad y confianza en el material cerámico y es idónea para espacios que requieren un plus de higiene.

The innovative Biosafe Tile finish has properties with highly antibacterial activity thanks to a complex process of research and technological development applied in the production of our mass-coloured porcelain.

The AINIA technology centre, with 2,800 m<sup>2</sup> of analytical infrastructures that respond to the diverse needs of the alimentary and related sectors, has verified the antimicrobial properties of our new porcelain tile by means of a test based on the ISO 22196 standard, which determines the antibacterial capacity of non-porous surfaces.

The active substances incorporated into the enamel of the pieces are capable of inhibiting the growth of bacteria. This new development increases the degree of safety and confidence in the ceramic material and is suitable for rooms that require extra hygiene.

## Características

Product attributes

### Con todas las propiedades de los porcelánicos Roca With all the properties of Roca porcelain tiles

Esta nueva característica se suma a la durabilidad, higiene, facilidad de limpieza, confort y diseño de nuestros porcelánicos. Junto a las propiedades antimicrobianas permanecen propiedades asépticas naturales de la cerámica, atributos de los pavimentos y revestimientos cerámicos como ausencia de porosidad, lo que le confiere un índice de absorción casi nulo, inalterabilidad y larga vida útil.

This new feature adds to the durability, hygiene, easy cleaning, comfort and design of our porcelain tiles. The antimicrobial properties remain along with the natural aseptic properties of ceramics, attributes of ceramic flooring and claddings such as the absence of porosity, which give it an almost zero absorption rate, inalterability and a long useful life.

### Propiedades definitivas Definitive properties

Las propiedades de Roca Biosafe Tile son permanentes y no se desgastan con el paso del tiempo.

The properties of Roca Biosafe Tile are permanent and do not break down with the passage of time.

## Aplicaciones y usos

Applications and uses

### Dónde utilizar Roca Biosafe Tile

### Where to use Roca Biosafe Tile

### Sin mantenimiento ni tratamientos posteriores Without subsequent maintenance or treatments

El componente antimicrobiano de Roca Biosafe Tile forma parte de la materia prima del porcelánico por lo que permanece en él tanto tiempo como vida tiene este material y no requiere de ningún tipo de tratamiento para conservar sus propiedades.

The antimicrobial component of Roca Biosafe Tile is part of the raw material of porcelain, so it remains within it for as long as the life of this material and does not require any type of treatment to preserve its properties.

### Eficacia total contra las bacterias Total effectiveness against bacteria

Roca Biosafe Tile cuenta con propiedades de efecto bacteriostático que proporcionan una seguridad adicional ante patógenos a los que la superficie cerámica pudiera ser expuesta.

Roca Biosafe Tile has properties with a bacteriostatic effect that provide additional safety against pathogens to which the ceramic surface could be exposed.

### Contrastado 100% 100% Calibrated

Las propiedades antimicrobianas han sido verificadas por el centro tecnológico AINIA mediante pruebas de ensayo basadas en la norma ISO 22196: 2011, que determina la capacidad antibacteriana de superficies no porosas.

ISO 22196 Eficacia antibacteriana garantizada.

The antimicrobial properties have been verified by the AINIA technological centre through trial testing based on the ISO 22196: 2011 standard, which determines the antibacterial capacity of non-porous surfaces.

ISO 22196 Antibacterial effectiveness guaranteed.

### Inocuo para la salud humana Safe for human health

Determinados elementos naturales impiden el metabolismo microbiano por lo que las bacterias no pueden sobrevivir ni desarrollarse sobre la superficie cerámica fabricada con este componente. Estas propiedades de Roca Biosafe no afectan de modo alguno al ser humano.

Certain natural elements, prevent microbial metabolism due to which bacteria cannot survive or develop on a ceramic surface made with this component.

These properties of Roca Biosafe do not affect human beings in any way.

Innovation, attention to detail, and technically and environmentally certified quality, make Roca Tiles the best ally for your projects. Because health begins with the right floor, porcelain tiles with Roca Biosafe Tile are ideal for spaces that require extra hygiene such as surfaces in health facilities, commercial areas, hospitality areas, as well as interior design projects.
