In & Out Technology

Seamless solution for every situation

The finish for In&Out is the result of the Roca Group's commitment to R&D. The innovative manufacturing process developed for In&Out, provides a silky, and at the same time, non-slip surface, reaching the maximum values required by Class 3 / R11 Technical Building Code for exteriors.

Innovative In&Out finishes, modular formats for total versatility and collections where natural inspiration, the artisan footprint, the brightness of marble and recognition of the industrial aesthetic are the protagonists

Innovadores acabados In&Out, formatos modulares para una versatilidad total y colecciones donde la inspiración natural, la huella artesana, el brillo de los mármoles y los guiños a la estética industrial son los protagonistas

ROCA has successfully presented its new ceramic collection at Cersaie, picking up the latest trends in interior design combined with an important technical development, to go one step further in the versatility and sustainability of its products.

Trends such as the fusion of interior and exterior spaces, the vindication of the handmade and the pottery heritage and the inspiration in natural elements such as stone, clay or wood, are combined in their collections with winks to the industrial aesthetic of cement and modern high contrasting ambiences, where marbles and graphite are the protagonists.

The commitment of ROCA to innovation and its permanent technological bet is embodied in the amazing textures and finishes of their new collections, in revolutionary products such as In&Out, an interior tile certified for outdoor use, or in the adoption of modular rectified formats in all its product ranges, which allow our imagination to be the only limit to combining its collections in the design of spaces.

ROCA ha presentado con éxito su nueva colección cerámica en Cersaie, recogiendo las últimas tendencias del interiorismo combinadas con un importante desarrollo técnico, para ir un paso más allá en la versatilidad y sostenibilidad de sus productos.

Tendencias como la fusión de espacios interiores y exteriores, la reivindicación del handmade y la herencia alfarera y la inspiración en elementos naturales como la piedra, el barro o la madera, se combinan en sus colecciones con guiños al cemento de estética industrial y modernos ambientes de alto contraste, donde mármoles y grafitos son los protagonistas.

El compromiso de ROCA con la innovación y su permanente apuesta tecnológica se plasma en las sorprendentes texturas y acabados de sus nuevas colecciones, en revolucionarios productos como In&Out, un cerámico de interior certificado para su uso en exteriores, o en la adopción de formatos rectificados modulares en todas sus gamas, que permiten que nuestra imaginación sea el único límite a la hora de combinar sus colecciones en el diseño de espacios.

The new marble collection brings us wider chromatic ranges than those typical in natural stone, a high degree of reflectivity and resistance thanks to an important technical development

Las nuevas colecciones de mármoles nos traen gamas cromáticas más amplias que las de la propia piedra natural, alto grado de reflectividad y resistencia gracias a un importante desarrollo técnico

Exceptional brightness

Excepcionalmente brillantes

ROCA polished pavements and coverings adopt the distinctive and elegant mirror like finish typical of freshly polished natural marble, with an explosion of colour that goes from the snowy white of Boheme Blanco to the intense black marbling of Western Sahara Noir, complemented with graphite finishes and the industrial touch of vitrified cement.

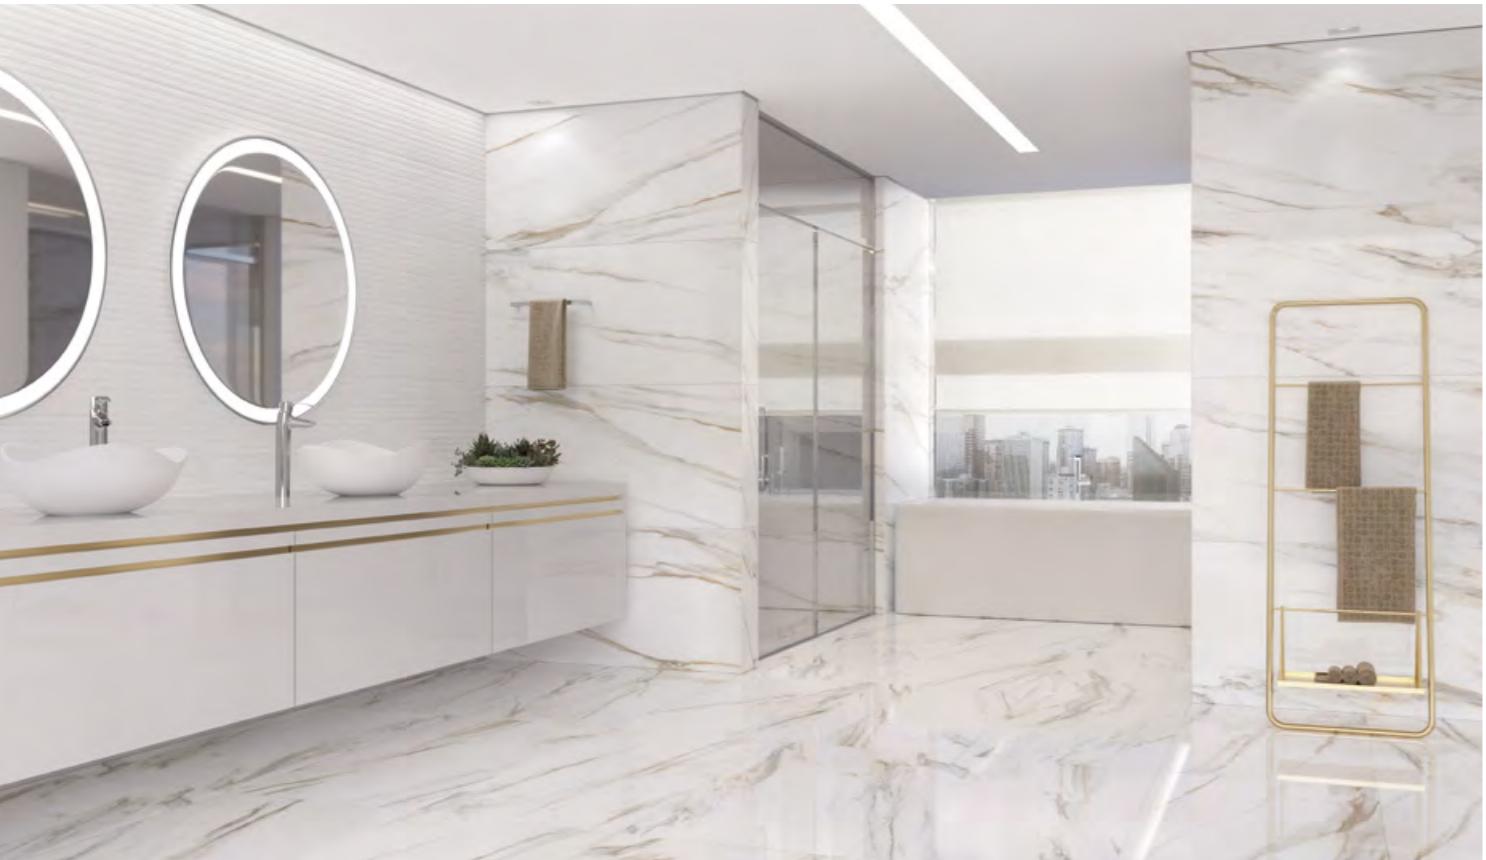

In lighter porcelain tiles the high gloss finish has a multiplying effect on the light, giving spaces a clean and airy, elegant and minimalist quality.

Los pavimentos y revestimientos pulidos ROCA adoptan el distintivo y elegante acabado espejular propio del mármol natural recién pulido, con una explosión cromática que va desde el blanco níveo de Boheme Blanco al negro intenso y veteado de Sahara Noir, complementado con acabados en grafito y el toque industrial del cemento vitrificado.

En porcelánicos claros el acabado de alto brillo tiene un efecto multiplicador de la luz, dotando a los espacios de una calidad limpia y diáfana, elegante y minimalista.

Tremendous shine

Los reflejos prodigiosos

LM Calacatta Gold MC 60x120 R / 24"x48"

LM Marmone Parana MC 120x120 R / 48"x48"R

The polishing effect also enhances the intensity of the dark tones, increasing the drama of the plays of contrasts wherever it is used adding greater sharpness to the reflections, thereby generating interesting visual symmetries that enhance the geometries of the spaces.

El efecto pulido realza también la intensidad de los tonos oscuros, incrementando el dramatismo de los juegos de contrastes allá donde se emplea y aportando gran nitidez a los reflejos, generando con ello interesantes simetrías visuales que realzan las geometrías de los espacios.

LM Noir ST Laurent NGPOL 120x120 R / 48"x48" R

In&Out

The first soft non-slip floor tile
El primer pavimento antideslizante suave

The In&Out finish is the fruit of the permanent bet of the ROCA Group on the continuous technological improvement of their products. It responds to an important technical development to develop a silky porcelain tile suitable for interiors, but one that fully meets regulations.

El acabado In&Out es fruto de la permanente apuesta del Grupo ROCA en la mejora tecnológica de sus productos. Responde a un importante desarrollo técnico para generar un porcelánico de tacto sedoso, adecuado para interiores, pero que cumple holgadamente la normativa.

Abaco Arena In&Out 60x120 R / 24"x48" R

ROCA reinvents the rules of the game with In&Out a soft porcelain tile that is usable interchangeably and without transitions in both interiors and exteriors.

The micro-textured adhesion properties increase in the presence of water, allowing for a certification as a TBC Class 3 / R11 non-slip floor.

Its properties are built into the material and therefore its properties are sustained over time, which makes it ideal for a pavement in high traffic areas.

An innovative delicately finished porcelain tile for use in interiors but with unique adhesion properties that allow outdoor use with Technical Building Code Class 3 certification / R11

Un innovador porcelánico de acabado delicado para su uso en interior pero con propiedades de adherencia únicas que permiten su uso en exteriores con certificación CTE Clase 3 / R11

Abaco

Abaco, presented at Cersaie, 2019 is the first ROCA collection offered with In&Out finishes. It evokes the textures of handcrafted cement offering a chromatic range in gray, sand, rust and graphite.

Abaco, presentada este 2019 en Cersaie, es la primera colección de ROCA ofrecida en acabado In&Out. Evoca las texturas del cemento trabajado artesanalmente ofreciendo una gama cromática en gris, arena, óxido y grafito.

Abaco Gris 60x60 R / 24"x24" R

Abaco Gris 40x120 R / 16"x48" R - Suite Ondas Abaco Gris 40x120 R / 16"x48" R - Abaco Grafito 30x60 R / 12"x24" R
Abaco Grafito 60x120 R / 24"x48 R - Abaco Lapato Grafito 60x120 R / 24"x48 R

Suite Cuadros Gris 40x120 R / 16"x48" R - Abaco Gris 60x120 R / 24"x48 R

With a sober basis rich in visual detail, the distinctive and unique finish of each piece and its large formats make it ideal for use in large spaces, that can be used thanks to its In&Out finish both in interiors exteriors or façades.

De base sobria pero rico en detalle visual, la elaboración distintiva y singular de cada pieza y sus amplios formatos lo hacen ideal para emplearlo en grandes espacios, pudiendo utilizarse gracias a su acabado In&Out tanto en interior, exterior o fachada.

Abaco Deko Gris 40x120 R / 16"x48"R - Abaco Gris 40x120 R / 16"x48"R
