- Grupo Lamosa is the world's second-largest ceramics producer.
- It is a global leader in the ceramics sector with production centres in Mexico, Colombia, Peru, Argentina, Brazil, Guatemala, Chile and Spain and offices spread over the five continents.
- The company has a production capacity of more than 227 million m2 per year in floor and wall coverings.

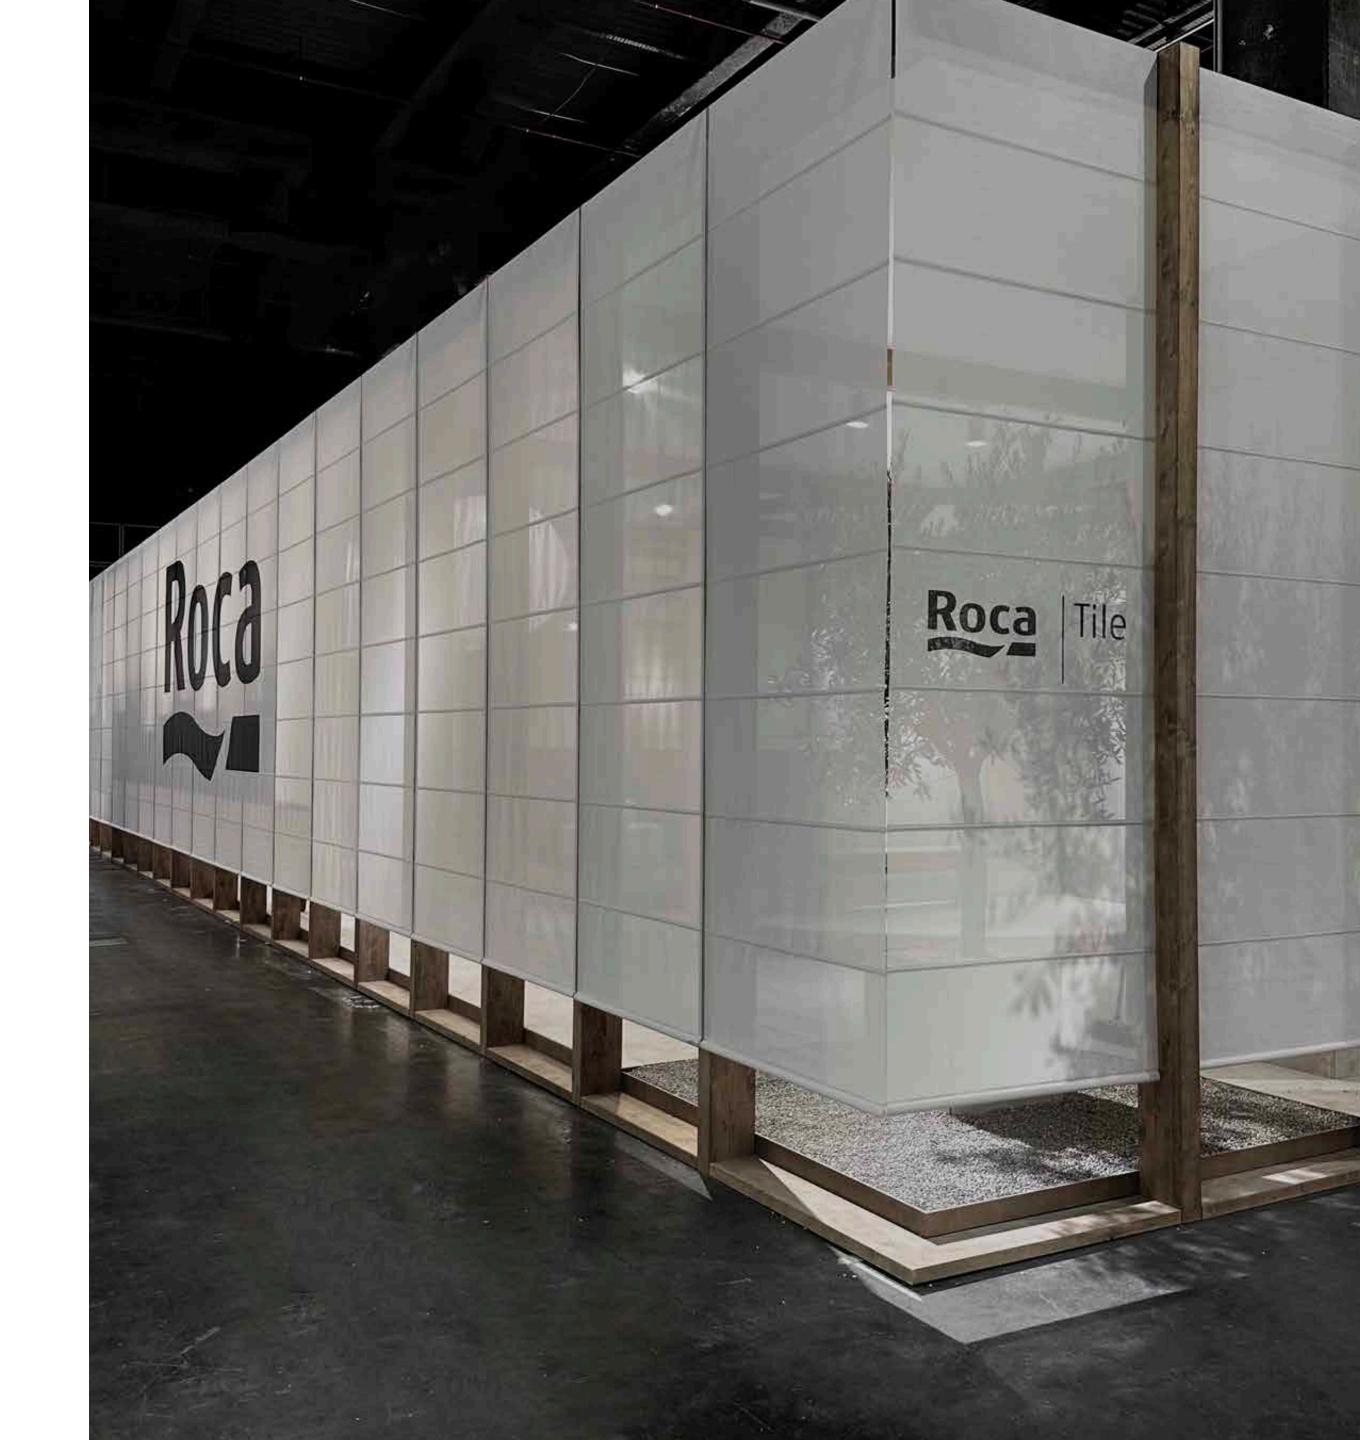

## About Roca Tiles

## Roca Tile

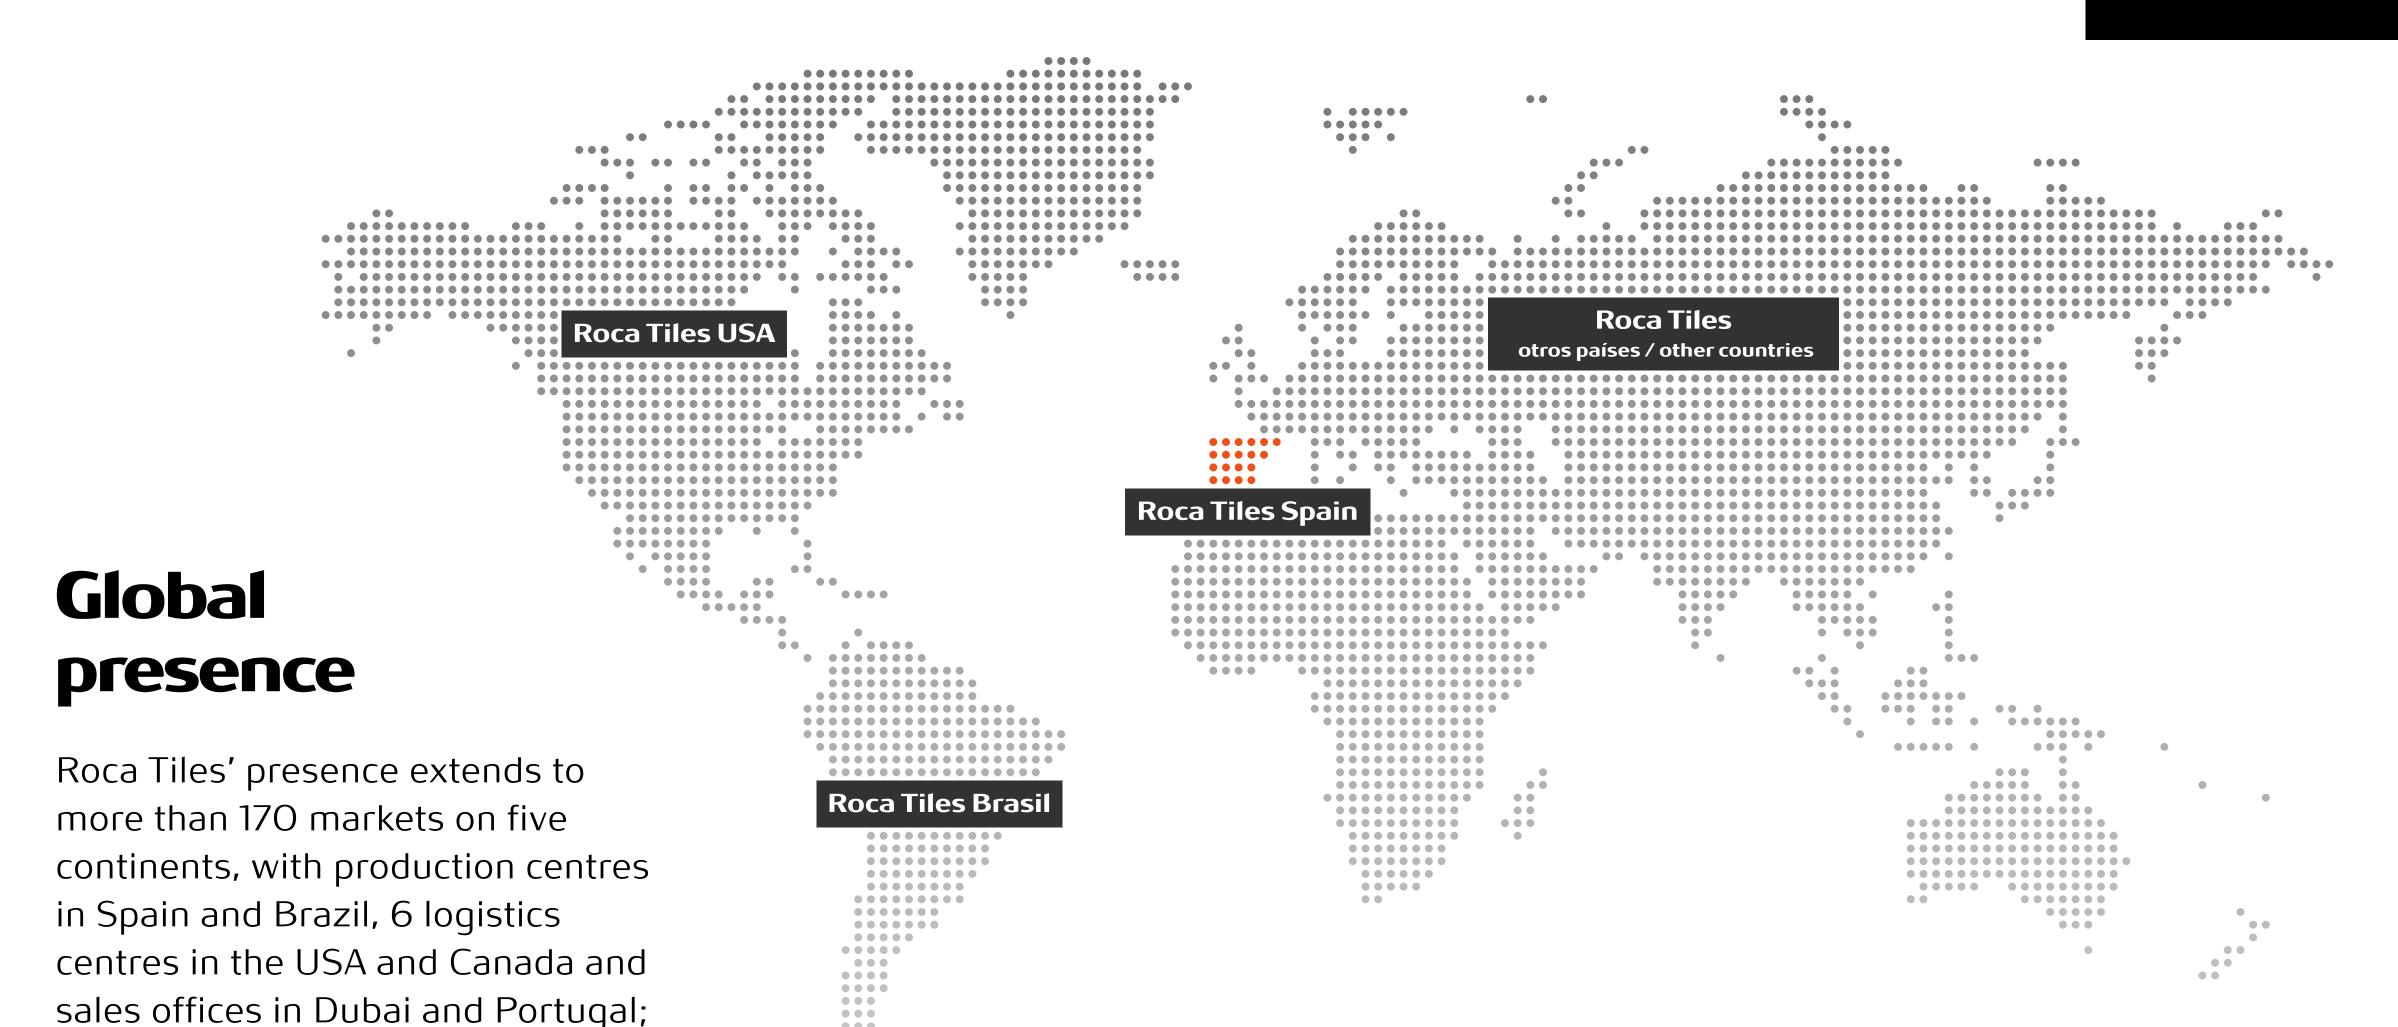

Roca Tiles is a global company that designs and markets **ceramic floor and wall tiles** for architecture, construction and interior design.

Roca Tiles is the premium brand of Grupo Lamosa and as such is positioned on a global scale in design, innovation and quality.

The main objective of **Roca Tiles and Grupo Lamosa** is to provide differential value through specialisation in key products. This strategy translates into consolidating their position as market leaders in Europe.

all at the service of excellence and

innovation.

#### Roca

## Integral innovation

Our way of understanding ceramics combines avant-garde formats with service and quality. We create collections focused on awakening the senses.

## Connection and cohesion

There is a seamless link between our collections, a natural transition between different product lines, offering an aesthetic and functional cohesion that is unique to the market.

## Leadership and support

Roca Tiles, as a premium brand of the Lamosa Group, benefits from exceptional production support. The Roca Tile brand anticipates market trends and is a benchmark within the group in terms of innovation and quality.

#### Large formats

Tiles with continuous aesthetics and finishes of exceptional realism that enrich our collections and multiply their possibilities of use. Innovative formats that can be used on a variety of surfaces to create high-value spaces.

## Complete collection

We work with complete collections covering all areas of application, from large format panels to traditional indoor and outdoor ceramics, along with decorative cladding or lightweight pieces that allow effortless installation on pre-existing surfaces.

#### Sustainability

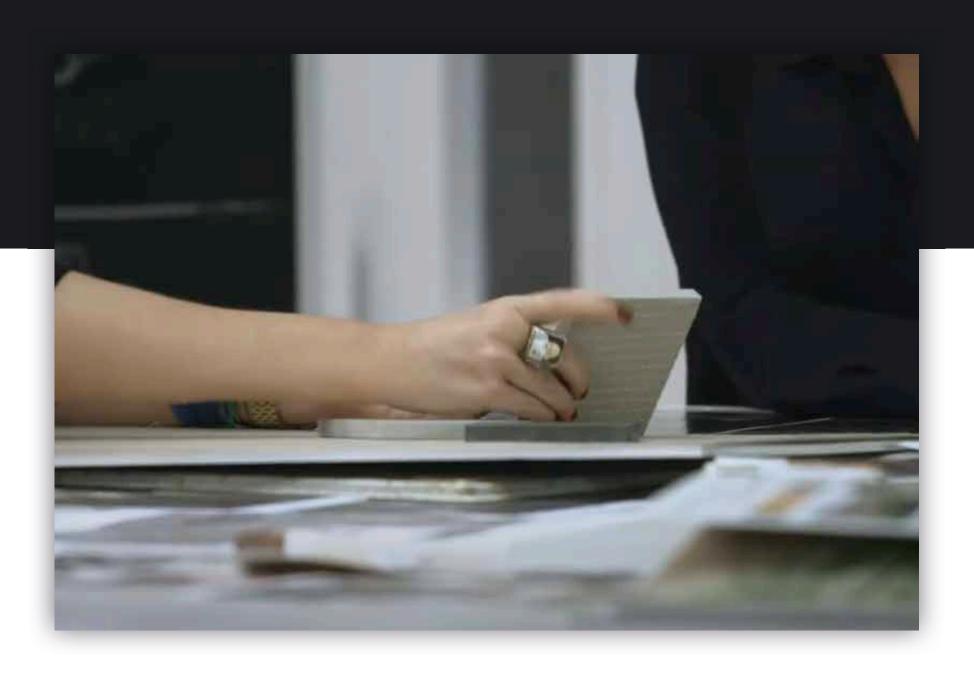

At Roca Tiles we apply rigorous continuous improvement programmes and sustainable criteria in all phases of our production process, which are periodically reviewed externally with the Integrated Environmental Authorisation (IEA), ISO 14001, ISO 14021, ISO 9001, DAPcons®, GlobalEPD, UPEC and CCC certifications, as guarantees of quality and respect for the environment of our ceramic floor and wall tiles.

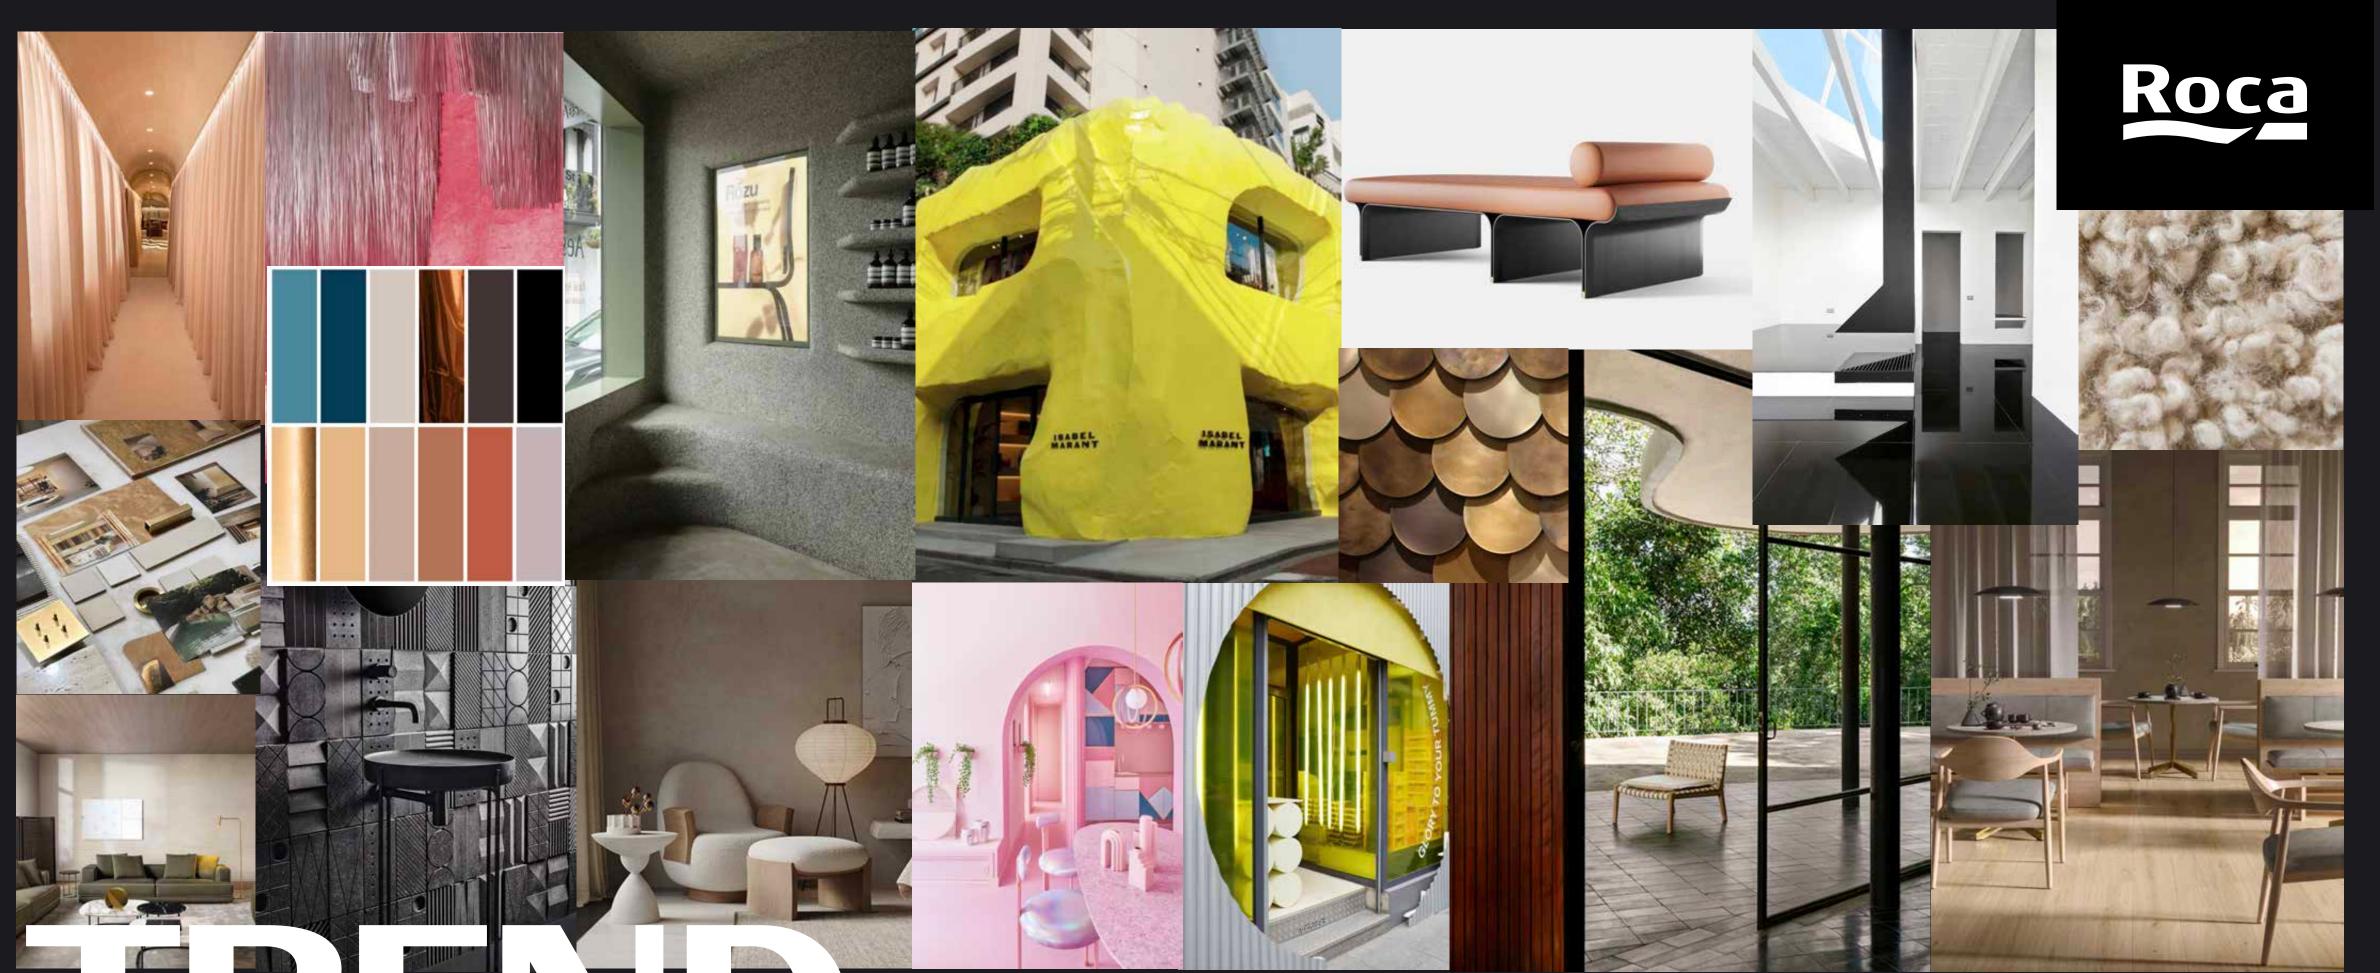

#### Design

Roca Tiles' marketing and product department is the creative soul behind our collections, emphasising innovation in formats, finishes and applications, as well as the integration between them.

Our portfolio is made up of exclusively original designs, distinctive to our brand. The Roca Tiles research and development team is dedicated to studying advanced processes to obtain the best version of each collection, and promote the creation of highly complex colour-rich finishes that are exclusive to the company.

## InTech+

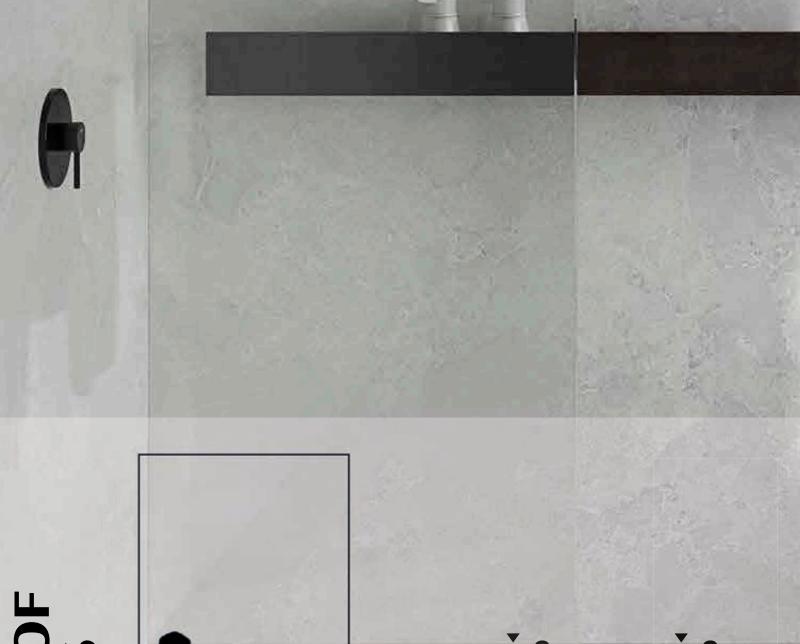

Innovation and technology at the service of absolute realism

Roca Tiles presents its new family of porcelain tiles InTech+, produced using advanced digital methods, with striking natural reliefs and a definitive realism.

The InTech+ family redefines the industry standards of porcelain tiles by combining cutting-edge technology with exclusive design and unique and large formats with infinite design and architectural possibilities.

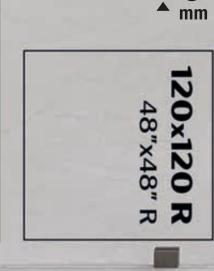

#### Complete collection: Avalon

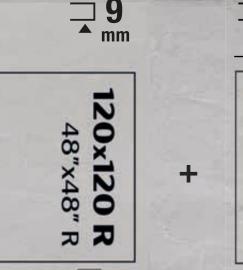

Avalon is a unique fusion of exceptional stone textures, inspired by classic natural stones and harmoniously combined with InTech+ technology that guarantees precision, realism, relief, detail and unrivalled aesthetics.

## Silky+

The softness that redefines design

Roca Tiles presents its innovative Silky+ finish, a revolutionary porcelain tile with an extrasmooth, super pleasant to the touch finish.

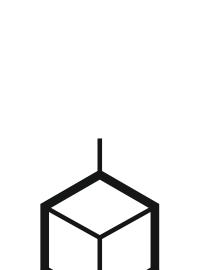

The glazes used for the Silky+ technique seal the surface of the piece, stopping dirt penetrate. In addition, Silky+ can be combined with other technologies and digital effects such as inks to create delicate veins in the marbles or relief effects with more creative graphics. Silky+ is a highly smooth porcelain finish suitable for wall cladding and interior flooring.

## Design and promotion tools

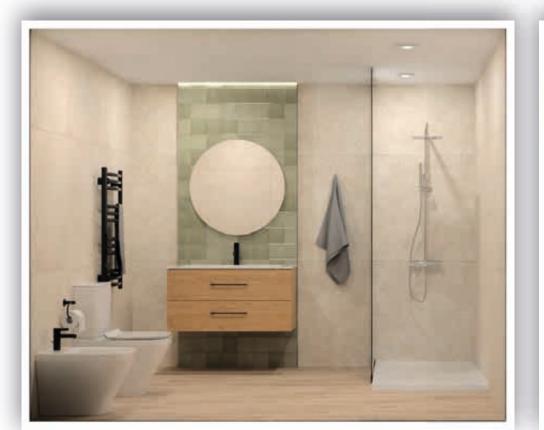

#### Roca Tiles 3D

Discover a new way of imagining and designing spaces with Roca Tiles 3D

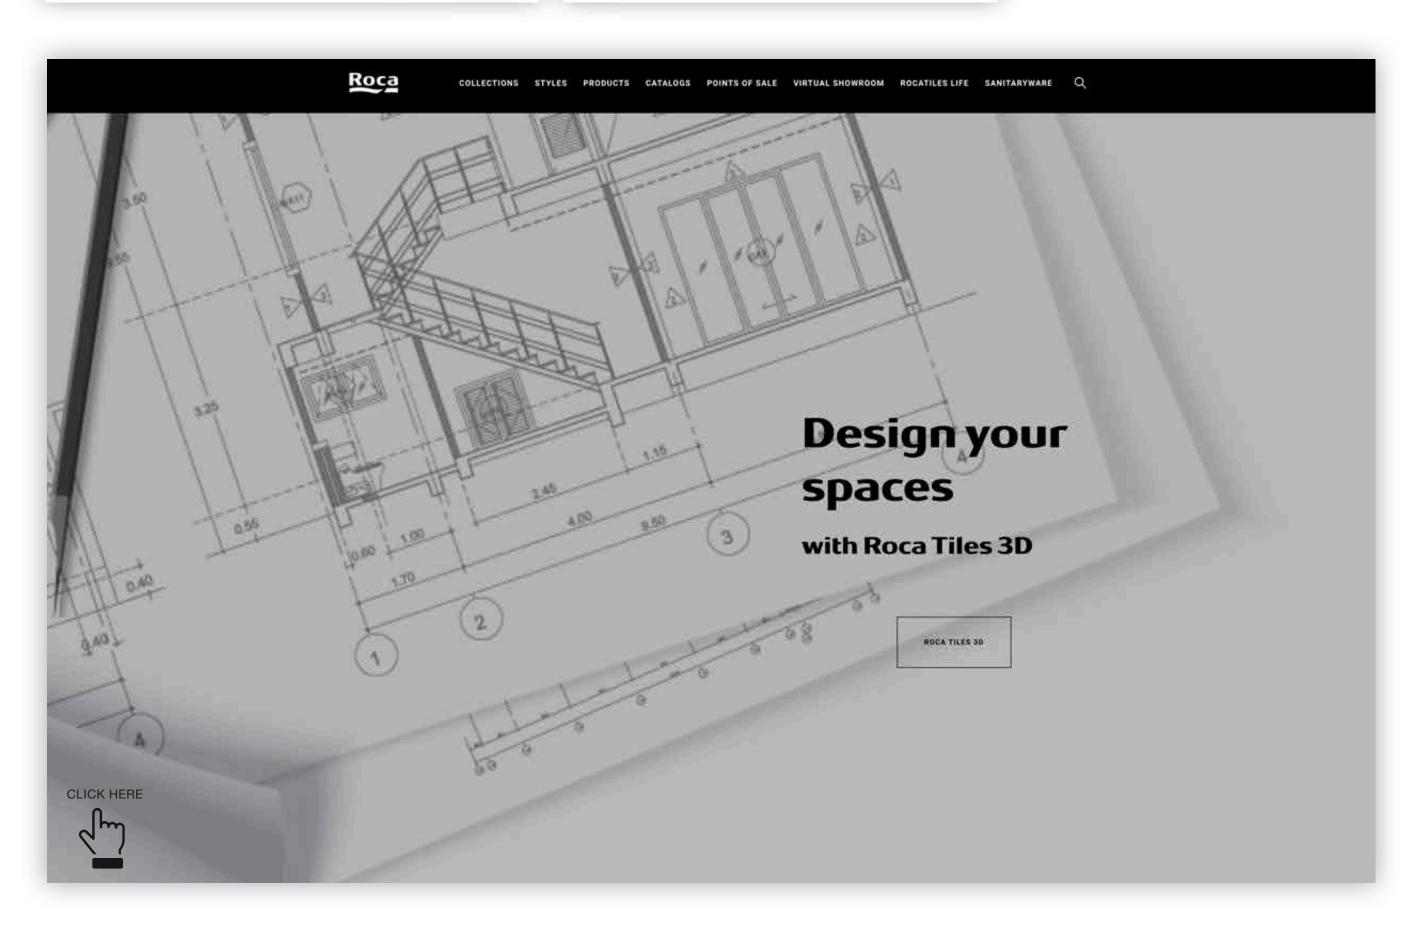

Bathroom and room design is now easier and more accessible thanks to Roca Tiles' innovative online tool. This **new 3D application**, available on our website, allows users to visualise and experiment with different styles, colours and textures, thus facilitating the task of designing spaces in an intuitive and versatile way.

Some environments designed with our 3D program.

Promotion Tools

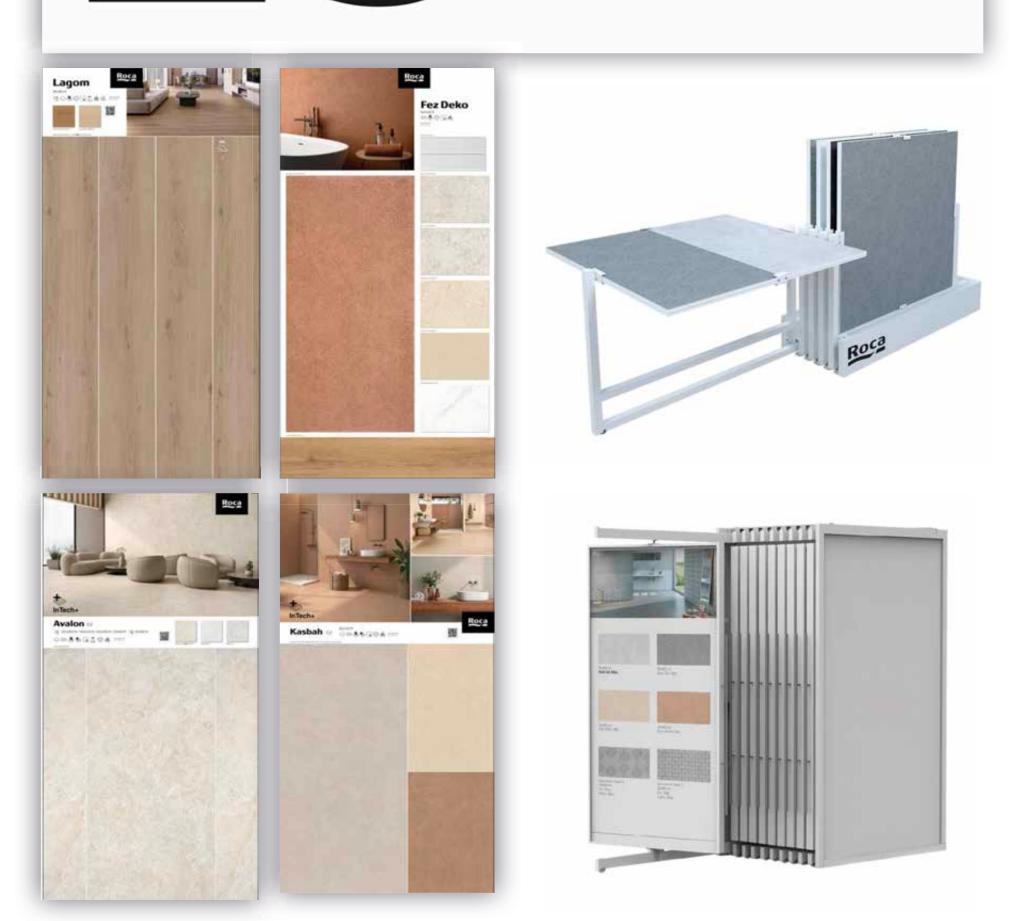

## Point-of-sale display

We help customers visualise the actual application of products and facilitate in-store purchasing decisions with resources such as **sample boards**, **displays**, **portable sample books**, **catalogues and printed materials**, along with carefully designed showroom environments to display collections effectively and attractively.
